# Bellevue Cemetery Records Project

These computerized burial records, visitor's map and definition of medical terms are the results of the combined efforts of the following individuals:

The map was created for a 1989 Eagle Scout project, by Jonathan T. Rowell, of the Boy Scout Troop 215 sponsored by St. Mark's Catholic Church; the burial records were taken from handwritten records saved by Ms. Naomi Yopp and Mr. Charlie L. Wolff, president of Bellevue Cemetery. Mrs. Barbara Woodbury completed the painstaking transfer of over 6,000 handwritten records to computer storage; Mrs. Deborah Wrede Ward managed the data layout; Dr. J. Richard Corbett researched the original medical terms and translated them to modern terminology. The project was made possible by the sponsorship of Mrs. Tabitha H. McEachern who has a family interest in the cemetery. M. Tyrone Rowell coordinated the project.

Care was taken to transfer all information as it was handwritten in the original burial book. No editing or spelling corrections were made. Book A is an alphabetical listing of all entries in the official burial book. Book B is a listing of burials sorted alphabetically within each cemetery section. Copies of both books A and B have been placed on file at the New Hanover County Library and at The University of North Carolina at Wilmington's Randall Library. Copies of the map are available at the Cemetery located at the intersection of Princess Street and 17th Street.
